

Reasons to Avoid the SARS-COV-2 Shots | v1

Risks in General

Insufficient safety trials and reporting/tracking of adverse events

- Even with the establishment of the Vaccine Adverse Events Reporting database, (VAERS), less than 1% of such events are estimated by a government-commissioned Harvard study to actually be reported, leaving us with no useful data on whether vaccines, especially experimental products, are as safe as we assume them to be. Other similar studies have corroborated the severe underreporting problem.

 - <https://jamanetwork.com/journals/jama/fullarticle/2777417>
 - <https://childrenshealthdefense.org/defender/vaccine-injury-reporting-systems-utterly-inadequate/>
- In the previous attempts to create similar coronavirus vaccine, all or most of the animals in the trials died when exposed to the actual virus, even though at first, researchers erroneously had assumed success due to the presence of antibodies. That exact step, the animal trial step, was skipped in making all of the SARS-COV-2 shots, instead going straight to the human population at large under emergency authorization. The manufacturers currently have no data to suggest that their products won't react in exactly the same disastrous way as their failed predecessors.

- Data gaps in key groups of individuals, such as children, the immunocompromised, those having been previously infected with SARS-COV-2, pregnant women, and more. Data gap in establishing long-term immunity longer than a few months. Data gap on the possibility of transmission of SARS-COV-2 infection.

- The SARS-COV-2 shot manufacturers are destroying the ability to even do long-term safety studies
 - <https://articles.mercola.com/sites/articles/archive/2021/04/20/coronavirus-vaccine-safety-studies.aspx>
- The virus was never isolated. A CDC document reads, "Since no quantified virus isolates of the 2019-nCoV were available for CDC use at the time the test was developed and this study conducted, assays designed for detection of the 2019-nCoV RNA were tested with characterized stocks of in vitro transcribed full length RNA"
 - * p. 42, <https://www.fda.gov/media/134922/download>

Possible creation of superbugs

- These SARS-COV-2 shots could easily create superviruses that are even worse than the one we are dealing with now, in much the same way that the imperfect prescription of antibiotics has led to the creation of superbacteria that are antibiotic-resistant.

Severe bodily damage from the spike proteins themselves

- The spike proteins themselves, which the SARS-COV-2 shots cause the body to produce, may attack vital organs and body systems, and this is going largely uninvestigated.
 - May attack 2 types of brain cells
 - <https://www.brighteon.com/3ef68971-87ad-4ac5-9a1c-8552364d8ccd>

 - May attack the vascular system. (The below source claims the spike proteins from the SARS-COV-2 shots shouldn't act in this same way but fails to substantiate such a claim or provide a rationale)

- Interview with Dr. Richard Fleming, <https://warroom.org/2021/04/13/expert-cardiologist-issues-dire-warning-experimental-vaccines-are-ineffective-and-could-cause-mad-cow-disease/>

Alarming prevalence of post-injection infertility, miscarriages, and menstrual disruptions, largely uninvestigated.

- Women report menstrual disruptions, and this is just now being investigated...and only independently investigated, at that
 - <https://www.dailymail.co.uk/femail/article-9446907/Some-women-report-heavier-painful-PERIODS-getting-COVID-19-vaccine.html>

Blood clots

- Blood clots ranging in severity are among the most widely publicized side effect of the SARS-COV-2 shots, and several medical professionals have come forward to explain why this is not surprising at all

Large-scale bans and recalls

- The AstraZeneca shot is banned in over 20 countries. The Johnson & Johnson shot uses the same technology and may carry similar risks
 - <https://thehighwire.com/videos/astrazeneca-vaccine-falls-from-grace/>
 - <https://www.businessinsider.com/astrazeneca-covid-vaccine-countries-suspend-denmark-thailand-batch-blood-clots-2021-3?op=1>

Inhaled mRNA has indeed been established as a technology, and it poses severe potential risks to specific groups of people

- Pfizer's own documents classify inhalation of a vaccinated person's air as well as skin contact as exposure to their shot and furthermore ask that these exposures be reported. Specifically concerning are the call-outs for breastfeeding women who merely inhaled the air of the vaccinated (point 8.3.5.2 on p. 69) and for men who breathe the air of the vaccinated and subsequently expose their partners around the time of conception (point 8.3.5.1 on p. 68)
 - <http://82.221.129.208/pfizeravax.pdf>
- Inhaled mRNA as a technology not only exists but has been studied as a potential drug itself and as a potential self-spreading vaccine

 - <https://thebulletin.org/2020/09/scientists-are-working-on-vaccines-that-spread-like-a-disease-what-could-possibly-go-wrong/>

DNA editing

- Studies have shown that adenovirus vector vaccines indeed could edit human DNA. The CDC has skirted around the issue of whether or not they still maintain the position that the SARS-COV-2 shots definitely could NOT edit human DNA.

Efficacy Concerns

Never proven to prevent infection, only symptoms ("disease")

- Fauci confirms
 - <https://www.dailymail.co.uk/news/article-8884031/Dr-Fauci-warns-early-COVID-19-vaccines-prevent-symptoms-not-block-infection.html>
- Stories where large percentages of a vaccinated population have gotten infected anyway are common, like this one in which nursing home vaccinated residents get SARS-COV-2 anyway
 - <https://www.nytimes.com/2021/04/21/health/vaccine-nursing-homes-infections.html?smid=fb-nytimes&smtyp=cur>

Those who received the shot could be more likely to be hospitalized

- <https://www.visiontimes.com/2021/04/21/uk-third-wave-fully-vaccinated.html>

SARS-COV-2 shots may be extra risky for those who already were naturally infected naturally

- Natural immunity is superior to vaccine-derived immunity, (see the section "Did We Even Need a Vaccine" > "Natural Immunity is Superior"), but nonetheless, people who already have natural immunity aren't being tested for it, doctors are giving them the SARS-COV-2 shots indiscriminately, and those people are then at an elevated risk for severe side effects.

Shot-Specific Concerns

Injuries and deaths by manufacturer

- Note that all the stats referenced below reflect an UNDERREPORTING of adverse events
 - * (See the "Risks in General" > "Insufficient safety trials and reporting/tracking of adverse events" section)
- USA
 - Search VAERS for adverse events data: <https://wonder.cdc.gov/vaers.html>

AstraZeneca

- Consistent record of criminal negligence in regards to safety. Now that these companies have zero liability for damages caused from their SARS-COV-2 shot, this is especially concerning.

Johnson & Johnson

Moderna

- Never has brought a vaccine to market before. We don't know what their stance on safety is, and with zero liability for any damages caused by their product, this is especially concerning.
- Although not widely publicized, this shot actually resulted in even more adverse events than the paused/banned Johnson & Johnson shot

Did We Even Need a Vaccine?

SARS-COV-2 has an extremely high survival rate, according to the CDC's own numbers

- 0-17, 99.998%
- 18-49, 99.95%
- 50-64, 99.4%
- 65+, 91%
- Source for all of the above: <https://www.cdc.gov/coronavirus/2019-ncov/hcp/planning-scenarios.html>

Suspicious circumstances paved the way to EUA

- Emergency use authorization (EUA) vaccines can only be used when no other alternative treatments exist. Hydroxychloroquine with zinc, as well as several other treatments and prophylactics, have been safety-approved for years, and even showed potential for effectiveness against SARS-COV1. Yet they were systematically and falsely demonized by western media, as if to clear the way for an EUA vaccine. (Once the SARS-COV-2 shots became available, the primary Lancet study questioning the safety of hydroxychloroquine was exposed as fraudulent, and subsequently, the demonization of it and other prophylactics suspiciously and quietly faded away.)

Natural immunity is superior

- T-cell immunity derived from actually HAVING the illness is superior to vaccine-derived immunity, since the natural immunity protects against a wider variety of viral variants by default and lasts longer, whereas the SARS-COV-2 shot primes the body to recognize just a spike protein
 - <https://www.nature.com/articles/s41586-020-2550-z>

SARS-COV-2 is a treatable illness

- It's a treatable illness, even in more severe cases. Early treatment with drugs reduces hospitalization and mortality by 75-85%

Corruption

Misleading statistics, media spin, anomalies

Inflation of deaths and cases

 - <https://www.nytimes.com/2020/08/29/health/coronavirus-testing.html>

- Doctors and hospitals paid off for SARS-COV-2 admitted cases and SARS-COV-2 patients put on ventilators, \$13k and \$39k on average, respectively
 - <https://www.click2houston.com/news/investigates/2020/07/07/trust-index-do-hospitals-get-more-money-from-medicare-for-covid-19-patients/>
- The CDC artificially inflated the reported death rate for SARS-COV-2 by changing the way cause of death was to be listed on death certificates. The changes included instructing medical professionals to record SARS-COV-2 as the cause of death regardless of whether patients tested positive for the virus and also regardless of other comorbidities. Before SARS-COV-2, it would have been absurd to list a coronavirus as the primary cause of death for an individual who passed away from heart disease, diabetes, and other similar conditions, as instead, it would typically be listed as a contributing factor on a separate line.

 - <https://www.mprnews.org/story/2020/04/03/change-to-death-certificates-could-boost-SARS-COV-2-counts>
- CDC's move to change the way cause of death is classified is a violation of federal regulations, according to IPAK. Namely, they skipped the 60-day public comment and peer-review process.

Media bias

- Vaccine failure headlines are spun to suggest blaming the unvaccinated, rather than admit said cases of vaccine failure; example:

- Youtube promises to censor anything that disagrees with the WHO's position, regardless of whether it's true, and regardless of the validity/credentials of the source. This shuts down the usual process of scientific discussion whereby researchers challenge each other's opposing views in an attempt to ultimately poke holes in each other's hypotheses and ultimately move closer to the truth.

Illegal/impossible to sue the SARS-COV-2 shot manufacturers in case of injury or death

 - <https://articles.mercola.com/sites/articles/archive/2016/11/13/vaccine-injury-exemptions.aspx>

- Instead, the only option is to fight through a secret vaccine court, where the odds are stacked high against the claimant. Furthermore, most people have no clue this option even exists.
 - <https://www.hrsa.gov/vaccine-compensation/index.html>
